Summary

Logical and organized software engineer with a strong foundation in full-stack development. Proficient in Next.js, React, Node.js, and designing bug-free, scalable systems to meet and exceed client expectations. Experienced in building accessible, user-focused applications aligned with industry standards. Adept at integrating modern tools and frameworks to deliver high-performance solutions.

Skills

Frontend

NextJS TypeScript Radix-UI API integration refineDev TailwindCSS React query Redux

Backend

AI/ML Integration Spacy/NL processing Node JS Express JS Python AWS amplify REST API Data Scraping MongoDB MySQL Firebase Lua

Tools

Git Linux Terminal Postman

Education

B.Sc in Physiology
University of Calcutta
2017-2020 | Kolkata, West Bengal

Higher Secondary
with Computer Science
Jawahar Navodaya Vidyalaya
2014-2015 | Kalyani, West Bengal

Languages

English Hindi Bengali

Interests

Coding Problem Solving DS and Algorithm Website Designing

Experience

Asynq — Full Stack Developer, Remote

May 2025 - Present Gurugram, Haryana

- Led frontend architecture and development using Next.js, building a monorepo for client, admin, and recruiter applications with shared components and utilities.
- Mentored a junior developer, conducting code reviews and guiding implementation of frontend best practices.
- Engineered a full-stack solution for a client project integrating GPT/Claude APIs for automated employee resume and performance analysis.
- Implemented tRPC-based API layer for efficient type-safe communication between frontend and backend services.
- Collaborated on system design and infrastructure planning to optimize AI integration and deployment workflows.

Dressme — Full Stack Developer

Nov 2023 - April 2025 Faridabad, Haryana

- Led application designing and developing for campaign, Developed Twitter bot and LinkedIn bot, used for product promotion.
- Improved recommendation algorithm in backend, reducing 5+ seconds of wait time, enhancing user retention.
- Assisted in High Level Design, Low level Design, and frontend workflow making in 2 main applications.
- Integrated AI and APIs into three applications, significantly improving user experience.
- Conducted large-scale data scraping using Python for AI training purposes.

Freelance Full Stack Developer

Nov 2020 - Oct 2023 Remote

- Developed and maintained various web applications using NodeJS and NextJS/React JS, integrating AWS cloud services.
- Built and optimized frontend components for responsive and efficient performance across devices.
- Designed scalable backend/headless scraper services with RESTful APIs, implementing SQL and NoSQL databases based on project needs.
- Collaborated closely with clients to gather requirements, troubleshoot issues, and deliver high-quality features.
- Gained familiarity with CI/CD practices, and serverless architectures.

KalimiX — Frontend Developer

Oct 2019 - Nov 2020

Added functionality to existing website, fixed bugs. Helped creating web-applications for clients, php as backend.
